3. *spec.* In the Church of England: A provincial synod or assembly of the clergy, constituted by statute and called together to deliberate on ecclesiastical matters.

There is a convocation of each of the provinces, Canterbury and York. The former is the more important, and is often referred to as 'Convocation' simply; it consists of two Houses, an Upper and a Lower (on the model of the Houses of Parliament). It was convoked originally in the time of Edward I, at the same time as the lay Parliament, for the purpose of self-taxation, but it gradually assumed synodical powers. In Ireland a convocation, supposed to be the first, formed by a union of the four provincial synods, met in Dublin in 1615; after the disestablishment of the Irish Church, it was superseded by the General Synod of the Church of Ireland, composed of both clergy and laity.

b. In the American Episcopal Church: A voluntary organization of the clergy of a subdivision of some of the dioceses, for mutual conference, promotion of missionary work, etc., but having no legislative function. Its president is called the *Dean of Convocation*. The name is also applied to the division of the diocese in question, e.g. 'Convocation of East Tennessee'.

The analogue in England is a conference of the clergy of an archdeaconry or rural deanery.

**Cony, coney** (*kɒni*, *kɒni*), *sb.* Pl. conies (coneyes). Forms: a. 2 cunin, 3 conyng, 4-5 conyng(e), 5 conninge, -yng, konyne, 5-6 cunnung, cunynge, -ing; B. 2 cunig, 4 conig, 5 connyg;

γ. 6-7 conie, conye, connie, -ye, conny, conney, cunnie, cunney, 6-8 cunny, 4- cony, 6- coney. [The current form represents OF. *conil*, *connil*, cogn. w. Pr. *conil*, Sp. *conejo*, Pg. *coelho*, It. *coniglio* = L. *cuniculus* = rabbit (also burrow, underground passage, military mine), according to ancient authors a word of Spanish origin. The OF. pl. (with *l* suppressed) *conis*, later *conis*, gave an Eng. pl. *conys*, *conies*, and this a singular *cony*, *conie*. The ME. *cunin*, *konyne*, *conyng* was a OF. *conin*, *connin*, Anglo-Fr. *coning*, a parallel form to *conil*, which gave also MDu. *conijn*, Du. *konijn*, and, with a for o, LG. *kantn*, whence mod. G. dim. *kaninchen*. In Eng. the form *cunying*, *cunning* came down to the 16th c.; but from the 13th c. onward it varied also with *cunig*, *conig*, *connyg*. The historical pronunciation is with (v); common spellings from 16th to 18th c. were *cunnie*, *cunney*, *cunmy*, and the word regularly rimed with *honey*,

*money*, as indicated also by the spelling *coney*; but during the 19th c. the pronunciation with long *o* has gradually crept in.

This pronunciation is largely due to the obsolescence of the word in general use, while it occurred in the Bible, and esp. in the Psalms, as the name of a foreign animal (sense 3); the oral tradition being broken, readers guessed at the word from the spelling. It is possible, however, that the desire to avoid certain vulgar associations with the word in the *cunmy* form, may have contributed to the preference for a different pronunciation in reading the Scriptures. Walker knew only the *cunmy* pronunciation; Smart (1836) says 'it is familiarly pronounced *cunmy*', but *cōny* is 'proper for solemn reading'. The obsolescence of the word is also a cause of the unfixed spelling; the Bible of 1611 has *conie*, *cony*, *conies*, modern editions *coney*, *conies* (cf. *money*, *monies*), an irregularity retained in the Revision of 1885.

The rabbit is evidently of late introduction into Britain and Northern Europe: it has no native name in Celtic or Teutonic, and there is no mention of it in England before the Norman period; in the quotations the fur, perhaps imported, appears before the animal. The Welsh *cuning*, *cuningen*, is from ME.; the Irish *cúimín*, and Gaelic *cúinean*, *cúineán* from ME. or AFr.]

1. A rabbit: formerly the proper and ordinary name, but now superseded in general use by *rabbit*, which was originally a name for the young only. b. Still retained in the Statutes, and in more or less familiar use with game-keepers, poachers, game-dealers, and cooks: in market reports, now usually meaning a wild rabbit. c. It is also the name in *Heraldry*. d. *dial.* In some districts applied to a young rabbit, but elsewhere more properly to an old one.

[Now found (in sense 2) in the Indian vernaculars generally: Urdu قولى, *qulī*, *qultī*, Bengali *kūli*, Tamil, Telugu, Canarese, Malayalam, *kūli*; of disputed origin.

By some considered to be originally Tamil, and identical with the word *kūli* 'hire, payment for occasional menial work', whence (either by metonymy, or as short for *kūli-kāram* 'hire-man', *kūliyāl* 'hire-person') *kūli* 'hiring, labourer, man who does odd jobs'. The objection to this is that the first known mention of Coolies early in the 17th c. refers not to the Tamil country, in the south, but to the region of Guzerat, in the west of India. On this account there is reason to think the word identical with *Kulī* or *Koli*, the name of an aboriginal tribe of Guzerat (see sense 1), which is actually found spelt *Kouli*, *Coolie* in the middle of the 17th c.

(The Kulis of Guzerat were well known to the Portuguese in the 16th c.; and these probably carried the name both to Southern India and to China (cf. 1745 in 2). It is probable that the similarity between *Kulī* and the Tamil word *kūli* 'hire' may have led to the use of *coolie* in Southern India in the sense of *kūli-kāram* or *kūliyāl*.)

† 1. A variant of *Kulī* or *Koli*, name of a numerous aboriginal tribe of Guzerat, formerly noted as robbers, but now settling down as respectable labourers and cultivators. *Obs.*

**Coom**, sb.<sup>2</sup> Sc. Also 8 *cumb*. [Of uncertain origin: the general sense appears to be that of an arched or rounded top, dome. Attempts have been made to identify the word with *Coomb* s. esp. in sense c, but on no valid grounds.]

**Coomb**<sup>1</sup>, **comb** (*kūm*), *dial.* Forms: see the separate senses. [The senses here included appear

to belong to the same original word, though this, from want of early evidence, is not quite proved. Sense 1 is found only in OE. as *cumb*; sense 2 is found from 14th to 17th c., in form *combe*, *combe*; its pronunciation is unfortunately unknown; sense 3 begins a 1500, and has the forms *comb*, *combe*, *coomb*, pronounced (*kūm*). OE. *cumb* was prob. identical with older LG. *kumb*, HG. *kump*; cf. mod.LG. and HG. *kumm* a vessel, in various dialects, a round deep vessel, basin, cistern, trough, etc. (also mod.G. *kumme*, older prob. *kumbe*). Besides this mod.G. has *kumpf*, LG. *kumpf*, a vessel (in many senses), a measure of corn and fruit,  $\frac{1}{4}$  of a maller, i. e. an English peck nearly. The Bremen Wörterbuch identifies the two LG. forms: 'kumm oder besser kumpf, tiefe schüssel': so that we have app. an OTeut. type \**kumbo*-, \**kummo*-, with by-form \**kumpo*- (as in *clump*, *clampf*), with general sense of vessel, or hollowed-out receptacle. As to the phonetic history, the vowel of OE. *cumb* was app. lengthened before *mb* as in *comb*, *climb*, *clamb*, with similar loss of *b*, and the *d* sound preserved in modern Eng. instead of being diphthongized, as in OE. *rim*, ME. *roum*, mod. Room. Cf. also **COOR**.]

'small valley, hollow' occurs in the charters, in the descriptions of local boundaries in the south of England; also in numerous place-names which still exist, as *Batancumb* Batcombe, *Brancescumb* Branscombe, *Eastcumb* Eastcomb, *Sealcumb* Salcombe, *Wincelcumb* Winchcombe, etc. As a separate word it is not known in ME. literature, but has survived in local use, in which it is quite common in the south of England: see sense b. In literature *coomb* appears in the second half of the 16th c., probably introduced from local use; a century later, it was still treated by Ray as a local southern word. OE. *cumb* is usually supposed to be of British origin: modern Welsh has *cwm* (*kūm*) in the same sense, also in composition in place-names as *-cwm*, *-gwm*, and in syntactic combination as *Cwm Bochlwyd*. A large number of place-names beginning with *Cum*-, especially frequent in Cumberland, Dumfriesshire, and Strathclyde, as *Cumwhiton*, *Cumdivock*, *Cumlongan*, *Cumloden*, appear to be thus formed. Welsh *cwm* represents an earlier *cumb*, O Celtic \**kumbos*.]

The OE. word might however be an obvious application of *cumb*, COOMB<sup>1</sup>, to a physical feature, though there is no trace of any such application of the cognate German words on the continent; in any case, if the Saxons and Angles found a British *cumb* applied to a hollow in the ground, its coincidence with their own word for 'basin, bowl, deep vessel' would evidently favour its acceptance and common use. This might further be strengthened, after the Norman Conquest, by the existence of a *F.combe* 'petite vallée, pli de terrain, lieu bas entouré de collines' (Littre, 12th c.), cognate with *Pr.*, *Sp.* and north *It. comba*, for which also a Celtic origin has been claimed. See Diez, Thurneysen, Littre. The phonetic history is the same as in COOMB<sup>1</sup>; in composition (in names of old formation) -*kūm* has sunk to -*kəm*.]

That the word is native in Scotland is doubtful: Jamieson's Dictionary knows nothing of it beyond Hogg's assertion, and it is not in common use. But in Cumberland it appears in some local names, as *Gillercambe*, the great hollow above Sour Milk Gill in Borrowdale, and as a separate word in *Glaramara Combe*, *Langdale Combe*. 1813 *Hogg Queen's Wake* 223 The dark cock bayed above the coomb Throned mid the wavy fringe of gold. 1872 *Jenkinson Guide Eng. Coop (kūp), sb.<sup>1</sup> Forms: 3-5 cupe, 4-7 coupe, 5-6 coope, 5-7 cowpe, 7 coup, 7-coop. [mod.E. coop, in 15-17th c. *coupe, coupe*, is app. identical with ME. *cupe, coupe* basket, pointing to an OE. \**clipe* fem., an unrecorded collateral form of *clipe* cask, bushel, basket; app. = Du. *kuipe*, MDu. *clipe*, Efris. *kufe*, MLG. *klippe*:—OLG. \**klipa* f. The German words are generally considered to be a L. *clipea*, in med.L. also *cōpa* 'cask'; but if this be their origin, it is difficult to account for the umlaut in OE. *clipe*, KIFE.

When *clipe, coupe* appears in ME., it is as a synonym of *kipe, kipe*, 'basket'; in sense 3 also *coop* and *kipe* are still synonymous. Sense 2 is not found in *kipe*, though a natural enough development of the sense 'basket'.

The phonetic development *clipe, coupe, coop*, is paralleled by *stīpīan, stīpīe, stoop*, and ON. *drīpīa, drīpīe, drōp*, where also the sound (v) is retained, instead of being, as usual, diphthongized to (au) in mod. 2. *Pol. Econ.* The combination of a number of persons, or of a community, for purposes of economic production or distribution, so as to save, for the benefit of the whole body of producers or customers, that which otherwise becomes the profit of the individual capitalist.

For the history of the term see the quotations. As origin-

ally used by Owen the name contemplated the co-operation of the whole community for all economic purposes, i.e. communism. In practice, the principle has been carried out in *production*, when a body of workmen corporately own the capital by which their concern is carried on, and thus unite within themselves the interests of capital and labour, of employer and employed; and in *distribution*, when an association of purchasers contribute the capital of a store by which they are supplied with goods, and thus combine in themselves the interests of trader and customers. See CO-OPERATIVE.

Econ.* II. i. (1876) 105 The essential characteristic of co-operation is a union of capital and labour. 1875 HOLYOAKE *Hist. Coop.* I. 68 The term Co-operation was at first... and for several years afterwards, used in the sense of communism, as denoting a general arrangement of society for the mutual benefit of all concerned in sustaining it. Later, the term Co-operation came to be restricted to the humbler operations of buying and selling provisions. 1879 ROGERS in *Cassell's Techn. Educ.* IV. 180/1 The workman... uniting in a trade partnership with other workmen, with the distinct purpose of using his own capital as well as his own labour under such an association. *Co-operative store*: a store or shop belonging to and supported by a co-operative society, with the purpose of supplying themselves with goods at a moderate price, and of distributing the profits, if any, among the members and regular purchasers.

(The earliest co-operative societies and stores were established as a first step towards the contemplated communistic organization of society, mentioned under CO-OPERATION. But the primary aim was gradually lost sight of, and in 1844 the principle was introduced of giving the profits not to the owners of the business, but, partly at least, to the customers.)

2. *Math.* Each of a system of two or more magnitudes used to define the position of a point, line, or plane, by reference to a fixed system of lines, points, etc. (Usually in *pl.*)

In the original (and most often used) system, invented by Descartes, and hence known as that of *Cartesian co-ordinates*, the co-ordinates of a point (in a plane) are its distances from two fixed intersecting straight lines (the *axes of co-ordinates*), the distance from each axis being measured in a direction parallel to the other axis. (The determination of the position of a place by *latitude* and *longitude* is a similar case.) The co-ordinates are *rectangular* when the axes are at right angles; otherwise *oblique*. The name *Cartesian co-ordinates* is also extended to the case of points in space (not in a particular plane) referred to three axes not in one plane intersecting in a point (like three edges of a box meeting at one corner).

Hence applied to various other systems, mostly named from the nature of the fixed figure, etc., to which the points are referred; as *Bipunctal co-ordinates*, co-ordinates defining a line or point by reference to two fixed points and a fixed direction. *Polar co-ordinates*, co-ordinates defining a point (in a plane) by reference to a fixed line (*initial line* or *axis*) and a fixed point (*origin* or *pole*) in that line; the co-ordinates of any point being the length of the straight line (*radius vector*) drawn to it from the pole, and the angle which this line makes with the axis (as in defining the position of a place by its *distance* and *bearing* from a given place). The name *polar co-ordinates* is also applied to an extension of this system to points in space. So *bicircular co-ordinates*, *bilinear c.*, *trilinear c.*, etc.

The long *o* of ME. *cōte*, evidenced also by the Du. form, which implies MDu. *\*cōte*, *coote*, makes impossible the conjecture that the word is connected with Welsh *cwt* short, which is on other grounds inadmissible. Prof. Newton thinks that there is a connexion between *coot* and *scoot* or *scount*, another name of the guillemot, and allied sea-fowl; but the early history of the latter is obscure.]

1. A name originally given vaguely or generically to various swimming and diving birds. In many cases it seems to have been applied to the Guillemot (*Uria troile*), the Zee-koet or Sea-coot of the Dutch.

1382 WYCLIF *Lev.* xi. 16 An ostriche, and a nyxt crowe, and a coote, and an hawk. 1398 TREvisa *Barth. De P. R.* xii. xxvi. Names Birds* 218 Guillemot. Quet (Aberdeen). [Cf. Queit (Aberd.) = Coot in Jamieson.]

2. Afterwards restricted in literary use to the Bald Coot (*Fulica atra*, fam. *Rallidae*), *Meer-koet* of the Dutch, a web-footed bird inhabiting the margins of lakes and still rivers, having the base of the bill extended so as to form a broad white plate on the forehead (whence the epithet *bald*); in U.S. applied to the allied *F. Americana*; and generically extended to all the species of *Fulica*.

Usually spelt *cooper* in the newspapers 1881-84, but pronounced *coper* by the fishermen, and so spelt in the publications of the Mission to Deep Sea Fishermen. In the memory of old smacksmen of Grimsby (as stated by Mr. J. F. Winttingham) the name goes back to 1854, when Flemish and Dutch *koopers* first began to frequent the fleets.]

A vessel fitted out to supply ardent spirits, etc. usually in exchange for fish, to the deep-sea fishers in the North Sea; a floating grog-shop.

The practice began in a comparatively innocent barter trade carried on by Dutch boats visiting the fishing fleets, when the latter fished in close to the land, off Camperdown and the Texel; but it led to the fitting out of 'floating grog-shops' to attend each fleet. Public attention was called to the demoralizing nature of the traffic in 1881, and it formed the subject of a convention between the British, German

and Dutch governments in 1882, for the carrying out of which an Act of Parliament was passed in 1888.

[In 15th c. *copperose*: cf. F. *copperose* (14th c. in Littré), *copperose*, *it. copporosa*, med.L. *cuperosa*, *cuprosa*, *coporosa*, in various early glossaries: see esp. Grimm, s.v. *Kupferrose*. Diez explained *cuprosa*, as = *cupri rosa* rose of copper, comparing the Gr. name χαλκαῖον, -ος lit. 'flower of copper'. It seems more probable that med.L. *cuprosa*, *cuperosa* was simply short for *aqua cuprosa* = Ger. *Kupferwasser*, Du. *koperwater*, and its association with *rosa* 'rose' merely an etymological fancy. That it was so understood is certain: cf. Kilian (Flemish 1599) '*Koper-rose*, *Koperwater*, chalcantum, vitriolum, vulgo *cuprosa* and *coppa rosa*'; and obs. Ger. *kupferrose* = *kupferwasser* (Henisch); also mod. Du. *kopperwood* copper-red, obs. Ger. *kupferroth*, L.G. *koperrödt*. See the many forms in German under *kupfer*, *rauch*, *ross*, *roth*, *ruß*, *wasser*, in Grimm. In F. *copperose* is also applied with more descriptive propriety to the disease *copper nose*; so in Ger. 'eine kupferose nase' (Grimm).]

1. A name given from early times to the proto-sulphates of copper, iron, and zinc (distinguished as *blue*, *green*, and *white* copperas respectively); etymologically it belonged properly to the copper salt; but in English use, when undistinguished by attribute or context, it has always been most commonly, and is now exclusively, applied to *green* copperas, the proto-sulphate of iron or ferrous sulphate (Fe SO<sub>4</sub>), also called *green vitriol*, used in dyeing, tanning, and making ink.

(The extension of the name beyond its etymological meaning is anterior to its appearance in English, and indeed inherited from Gr. χαλκαῖον, the description of which by Dioscorides gives prominence to *blue vitriol*, while its use as shoemaker's ink implies *green vitriol*; the same is true of Pliny's account of *chalcantum*. It is probable that, at all times, the occurrence of composite salts containing a variable proportion of copper and iron, as well as the failure to distinguish between copper and iron pyrites, contributed to the confusion. It has to be remembered also that from the mediæval point of view 'copperas' was a *species*, occurring in various colours, the difference of composition being only vaguely apprehended, and that the phenomenon of the dissolving of iron by a solution of green copperas, with deposition of its copper, was explained as conversion of iron into copper by the mediation of the 'copperas', which changed its colour from blue to green in the process.)

1. A hard calcareous substance consisting of the continuous skeleton secreted by many tribes of marine coelenterate polyps for their support and habitation. Found, according to the habits of the

species, in single specimens growing plant-like on the sea-bottom, or in extensive accumulations, sometimes many miles in extent, called *coral-reefs*.

*a.* Historically, and in earlier literature and folk-lore, the name belongs to the beautiful *Red Coral*, an arborescent species, found in the Red Sea and Mediterranean, prized from times of antiquity for ornamental purposes, and often classed among precious stones. *Pink coral*: a pale variety of this.

White Coral differs still more. The axis is stony or calcareous; but the polyps are contained in lamellated star-like cavities, and not in the fleshy cortical substance.

2. (with *a* and *pl.*) *a.* A particular species of the preceding, or of the colonial zoophyte of which it is the skeleton; also, a single polypary or polypidom in its natural condition (= CORALLUM).

The coralligenous zoophytes belong to the two classes *Anthozoa* (or *Actinozoa*) and *Hydrozoa* of the COELENTERATA (q.v.). Both these classes contain families of compound, aggregate, or colonial zoophytes, secreting a continuous calcareous skeleton, which goes on growing by the constant development of new polyps or individual animals, each, like the bud of a plant, springing from and connected with the common stock. The *Anthozoa* are usually subdivided into two sub-classes, *Alcyonaria* (= *Oactinaria*), to the colonial families of which belong the Red, Blue, and Organ-pipe corals; and *Zoantharia* (= *Hexacorallia*), of which the division *Antipatharia* contains Black coral, and *Madreporaria* the Madrepores, Brain-corals, Mushroom-corals, Star-corals, etc., the chief reef-building corals. To the class *Hydrozoa* belong the *Milleporæ*, which are only distantly related to the other coralligenous animals, though their calcareous skeletons also form extensive reefs.

Prob. first given to the calcareous sea-weed *Corallina officinalis* (sense 1 below); but also including the compound animal organisms of plant-like habit growing in the sea, then thought to be plants. When the animal nature of coral was recognized, the corallines (including *Corallina*) were transferred to the animal kingdom. More accurate knowledge has since separated senses 1 and 2. The animal 'corallines' have moreover been found to belong to entirely distinct zoological divisions, some of them (*Polysa*) being Coelomata, others (*Hydrasoa*) being Coelenterata; hence the name is no longer a term of Zoology, though retained in popular use, as in 'a collection of sea-weeds and corallines'.

3. Comb. corbie-gable, a gable having corbie-steps; corbie-steps, projections in the form of steps on the sloping sides of a gable; occurring in old houses in Scotland, the north of England, and on the Continent.

[This term appears in Jamieson's Dict., 1808, as a modern Sc. vernacular name, with the synonym *cat-steps* (also G. *katsentreppe*); another form, not given by Jamieson, is *craw- or crow-steps*, used in the south of Scotland. These names have app. no literary history, and are evidently popular designations, meaning steps such as only a perching or climbing animal, like a crow or cat, could get at or use. Jamieson, however, offered the conjecture that *corbie-steps* might be a corruption of 'corbel-steps' (of the existence of which he had no evidence whatever), and this merely fictitious form has been adopted in some Dictionaries, etc.]

**Corduroy** (kə'dʊəri), *sb. and a.* Also 8 corderoi, 9 cord de roy, corde du roy. [A name app. of English invention: either originally intended, or soon after assumed, to represent a supposed Fr. \**corde du roi* 'the king's cord'; it being a kind of 'cord' or corded fustian.]

No such name has ever been used in French: on the contrary, among a list of articles manufactured at Sens in 1807, Millin de Grandmaison *Voyage de Départ. du Midi* I. 144 enumerates 'étouffes de coton, futaines, kings-cordes', evidently from English. Wolstenholme's Patent of 1776 mentions nearly every thing of the fustian kind except corduroy, which yet was well known by 1790. *Duroy* occurs with *serge* and *drugges* as a coarse woollen fabric manufactured in Somersetshire in the 18th c., but it has no apparent connexion with corduroy. A possible source has been pointed out in the English surname *Corderoy*.]

**Core** (kōr), *sb.* Forms: 4- core; also 4-5 coore, 5-7 coare, 7 chore, choare, kore, quore), 7-8 coar. [Appears c 1400, in senses 1, 2; core has been the prevailing spelling from the first. Etymology uncertain.]

Minshew conjectured 'perhaps it hath its name from L. *cor* the heart, because it lieth in the middle of the fruit'. Skinner pronounced it 'from F. *coeur*, It. *cuore*, L. *cor*', which has been repeated by most etymologists since. But the original meaning does not agree with any sense of the L. *cor* or Fr. *coeur*, and it was not app. till late in the 16th c. that any one thought of associating it with the notion of 'heart'. Moreover the OF. word was *cuier*, which in the end of 14th c. gave place to *cuier*, latinized after the Renaissance to *cuore*, *cuor*. Other conjectures are that it represents F. *corps* (OF. also *cor*) body, or *cor* horn. Some support is given to the last by sense 3 (see esp. quof. 1580); but the persistent final *e* of the Eng. word is a great obstacle to any such derivation. The primary sense of *core* had formerly been expressed by *Colr.*]

II. *spec.* The fruit of the cereals.

3. *collective sing.* The seed of the cereal or farinaceous plants as a produce of agriculture; grain.

As a general term the word includes all the cereals, wheat, rye, barley, oats, maize, rice, etc., and, with qualification (as *black corn*, *pulse corn*), is extended to leguminous plants, as peas, beans, etc., cultivated for food. Locally, the word, when not otherwise qualified, is often understood to denote that kind of cereal which is the leading crop of the district; hence in the greater part of England 'corn' is = *wheat*, in North Britain and Ireland = *oats*; in the U.S. the word, as short for *Indian corn*, is restricted to *maize* (see §).

5. U.S. Maize or Indian corn, *Zea Mays*; applied both to the separated seeds, and to the growing or reaped crop.

Wheat, rye, barley, oats, etc. are in U.S. called collectively *grain*. *Corn* in combinations, in American usage, must therefore be understood to mean *maize*, whereas in English usage it may mean any cereal; e.g. a cornfield in England is a field of any cereal that is grown in the country, in U.S. one of maize.

The herd was numbered, or the flock, the tenth animal was set apart as the prerogative of the king or overlord.

¶ The following erroneous explanation given by Littleton, as an 'it is said', has been repeated in the Law-books and Dictionaries down to the present time. It was perhaps founded on the passage from Bracton given above, in which there is mention both of a tenure by serjeanty, and of 'cornage' or horn geld.

Ger. *cornel*, *cornell-baum* (16th c. in Grimm), *kornel-beere*, app. 1—OHG. *cornulbaum*, -ber, *churnelbere*, *quernilbert*. According to Hildebrand, Kluge, etc., OHG. *cornul*, *cornul* was ad. med.L. *cornolium* (or ? *cornolius*) *cornel-tree* (in Du Cange). This med.L. seems to be formed on F. *cornouille* (in 16th c. *cornouille*, *cornouille*) 'cornel-cherry', which Diez refers to a pop. L. \**cornuculum* (in pl. -a), dim. of L. *cornum* 'cornel-cherry', the fruit of the *cornus* or *cornel-tree*.

The Ger. *kornelbaum* is also the source of Da. *korneltræ*, Sw. *kornelträd*. Mod. Ger. has *kornelle* for the fruit. From F. *cornouille* is derived Du. *kornelje*, whence Brereton's *cornouille* (quot. 1634). Various formed derivatives of L. *cornus*, *cornum*, and the adj. *cornuus*, appear in CORN-TREE, OE. *cornutree*, and It. *cornio*, *corniolo* the tree, *cornia*, *corniola* the fruit (cf. 1. English name of the botanical genus *Cornus*, of which the ancient writers and early herbalists distinguished two 'sorts', *Cornus mas* 'Male Cornel', and *C. femina* 'Female Cornel'. The former was the *Cornel-Tree* (see 3 a) or *Cornelian Cherry-tree*, the *Tane Cornel* of Lyte (*C. mascula*), a large shrub or low tree bearing edible fruit, a native of Southern Europe, sometimes cultivated in Britain; the latter was the *Cornel-bush*, *Wild* or *Common Cornel*, or *Dogwood* (*C. sanguinea*), a common hedge-row shrub in the south of England, of which the berries are not edible. *Dwarf Cornel* is a modern book-name of *C. suecica*, and in N. America of *C. canadensis*. With other qualifying words the name is sometimes given to other species of *Cornus*, of which more than twenty are known.

Diez referred the name to L. *cornu* horn (cf. esp. L. *corneolus* horn-like, dim. of *cornuus* of horn, horny), 'because the colour is (sometimes) like that of the finger-nail', comparing ONYX, Gr. *bvñ* nail. But grave objections to this are pointed out by Schade, who thinks the stone had its name from its likeness in colour to the *Cornel-berry* or *Cornelian-cherry*, L. *cornum*, adj. *cornuus*; in It. *corniola* was both the fruit and the stone.

Late in the 15th c. the L. *corneolus* was perverted to *carneolus*, after *carum* flesh, *carneus* flesh-coloured; thence an occas. MHG. *carneöl*, and the Eng. by-form CARNELIAN.]

**Cornice** (kōr-nis), *sob.* Forms: 6- cornice, 7 cornishe, corniche (coronix), 6-8 coronice, 6 coronich, (cornix), 6-9 cornish. [The forms *cornice*, *cornishe*, were taken immed. from F. and It. equivalents: cf. 16th c. F. *cornice*, *cornise*, in Cotgr. *cornice*, *corniche* 'the cornish or brow of a pillar or wall', *mod. F. cornice*; ad. It. *cornice* (kornī'tsē) 'the ledge whereon they hang tapestrie in any room; also an out-jetting pece or part of a house or wall' (Florio); *cornice* represents the It. spelling; F. *corniche*, Eng. *cornish* derive from It. pronunciation. The variants *coronix*, *coronice*, are based on 16-17th c. latinized forms.

It. *cornice*, the source of the word in all the mod. langs., is known from the beginning of Italian literature, being frequent in Dante. In form it is identical with *cornice*:—L. *cornix*, stem crow (*Cornus Cornix*), and by Florio it is treated as the same word; in the *Vocabolario della Crusca* the two are separated. The L. term for the architectural cornice was *cornua* (Vitruvius), and some have conjectured that the It. *cornice* is in some way derived or corrupted from that word, the form *cornix* cited by Du Cange, and used in Eng. by Shute in 1563, being assumed to be a connecting link. But there is no evidence for L. *cornix* before 16th c. Du Cange's example is of 1643, his example of *cornix* of 1605; both appear to be merely latinized forms of the Italian word, *cornice* being contaminated by the desire to connect it with *cornua*. Another suggestion is that the It. *cornice* was in some way related to L. *cornis*, *-idē* = Gk. *κορνίσιος*, given in Hesychius in the sense *τὸ ἐκτεταγὸν τῆς οἰκοδομῆς ἐνδομα* 'the finishing piece placed on the building', the 'cope-stone'. But this could not have phonetically given It. *cornice*, unless indeed the Gk. word had passed into popular Italian use, and been assimilated by popular perversion to *cornice* crow. Of this we have no evidence.]

Diex and others take *caporale* as the original form, as a derivative of *capo* head; but this leaves the -or- unaccounted for. This favours a derivation from It. *corpo*, L. *corpore*-body (i. e. of troops), with subsequent contamination by *capo*.

**Corpse** (kōps, kōps), *sb.* Formerly 4-8 corps; also 6-7 corps, *Sc.* corpses. [ME. *corps*, originally a variant spelling of the earlier ME. *cors* (see CORSE), a. OF. (11-14th c.) *cors* = Fr. *cors*: = L. *corpus* body. In the 14th c. the spelling of OF. *cors* was perverted after L. to *corps*, and this fashion came also into Eng., where *corps* is found side by side with *cors*, and became gradually (by 1500) the prevalent, and at length the ordinary form, while at the same time *cors*, from 16th c. spelt CORSE (q. v.), has never become obsolete. In Fr. the *p* is a mere bad spelling, which has never affected the pronunciation. In Eng. also, at first, the *p* was mute, *corps* being only a fancy spelling of *cors*; but app. by the end of the 15th c. (in some parts of the country, or with some speakers) the *p* began to be pronounced, and this became at length the ordinary practice; though even at the present day some who write *corpse* pronounce *corse*, at least in reading. The spelling with final *e*, *corpse* (perhaps taken from the modern pl. *corpses*) was only a rare and casual variation before the 19th c., in which it has become the accepted form in the surviving sense 2, which is thus differentiated from CORSE, used with French pronunciation in the military sense. In Fr. *cors*, *corps* the pl. is the same as the sing.; in Eng. also the ordinary plural down to 1750 was *corps*, though *corpses* is occasional from 16th c. In the 17th c. *corps* meaning a single dead body was often construed as a plural = 'remains', as is still the case dialectally; in Sc. *corps* pl. gave rise to a truncated singular *corp* before 1500.

Comparing the history of F. *cors*, *corps*, and that of Eng. *cors*, *corps*, *corpse*, we see that while mod. F. (kōr) has in pronunciation lost the final *s*, Eng. has not only retained it, but pronounces the *p*, and adds a final *e* mute, which is neither etymological nor phonetic, but serves to distinguish the word from the special sense spelt *corps* and pronounced (kōr).]

†**Corse, course, v.** *Obs.* or *dial.* [Of uncertain origin.]

In sense it is identical with *Cors v.*, being the usual English form which *cors* is mostly Sc.; this, with the fact that both *cors* and *course* certainly go back to an early date, makes it almost impossible to consider them as mere phonetic variants arising from the vocalization of r in *course*, or the insertion of r into the spelling of *cors*. It is, however, in favour of their identity that there is a third verb, *Scorse*, variously written *skoarse*, *skoce*, *scorse*, *scource*, synonymous in meaning with *course* and *cors*; and that it has both *consonare* and *scossonare* to coarse or trucke horses with a house-coarse (Florence).

1641 S. SMITH *Herringbuss Trade* 7 The Corved Herring, which are to make red Herrings, are those that are taken in the Yarmouth seas, provided that they can be carried on shore within 2 or 3 days after they be taken, otherwise they must be pickled. The Corved Herrings are never gipped but rowed in salt, for the better preservation of them, till they can be brought a shore, and if any be preserved for to make Red-herrings, they are washed out of the pickle before they be hanged up in the Red-herring houses. 1641 — *True Narr. R. Fishings* 4 For the latter Fishing, if Corved Herrings, the best vent of them is at Yarmouth, to make red Herrings. Hence, c 1682 in J. COLLINS *Making of Salt* 106; and 1727-51 CHAMBERS *Cycl.* s.v. *Herring*.

[App. the same as MDu. *korffharinck*, mentioned under CORVE, of which the exact sense is equally obscure. A suggestion is that, as *tonharinck* is barbelled herring, *korffharinck* may be herring not barbelled, but brought ashore in baskets. *Corved* would then be 'put in a corf or corves'.]

† In the *Dict. Rusticum* 1704, the quot. from S. Smith is given, s.v. *Herring-fishery*, with 'corved' misprinted 'corred'; whence ASH 1775 has the spurious 'Corred' (in the herring fishery) rolled in salt, prepared for drying, which has been mechanically repeated in many subsequent Dictionaries: some of the most recent invent a fictitious vb. trans. 'Core, to roll herrings in salt and prepare them for drying'.

This is phonetically satisfactory, and the sense of 'lamb dwelling in a cot' or 'kept by a cot-sæta or cottar' finds support in It. *cascicio* a tame lamb bred by hand, f. *casa* house; Ger. *hauslamm* house-lamb and 'pet', is analogous. Cf. also 'Cotts, lambs brought up by hand, cades', Marshall *Rural Econ. E. Norfolk*, 1787 (whence in Grose 1790). There is however a long gap between the *coscer* of Domesday and the *cosset* of 1579, during which no trace of the word in either sense has been found.]

The construction of this verb is idiomatic, and for its analysis it is necessary to go back to Latin. *Hoc constitit mihi tribus assibus* was literally 'this stood (to) me in three asses'. The dative of the person has in Eng. become an indirect object, to being never expressed; the Lat. locative (ablative or genitive) of the amount or price became a simple object in French, and remains an adverbial object in English, *in* being never expressed. Hence a natural tendency to view the noun *ex-*

pressing the price as a simple object, and the verb as transitive. That it is yet really intransitive is shown by the fact that it has no passive either with the price or the indirect object as subject; 'this cost me nothing' cannot be changed into 'nothing was cost me by this' or 'I was cost nothing by this'. The adverbial adjunct may also be expressed by an adverb as *much, little, more, less, dear* (cf. *L. carius constat*): even here the tendency is to look upon *much, little*, etc. as adjs. used substantively.]

1. A kind of apple of large size.

Often mentioned from 14th to 17th c., after which the word passes out of common use, though still retained by fruit-growers in the name of one or more varieties of apple identical with or derived from the original Costard. The latter is described by R. Hogg, *British Pomology* 1853, as a large apple, distinctly five-sided, having five prominent ribs extending into the basin of the eye, and forming ridges round the crown. A Kentish grower who has *Martin's Costard*, describes it in May 1892, as 'a very large apple, shape oval, very much ribbed, a strong grower, bearing every other year.'

By the Stannaries Act, the Cost-book must be made up and laid before the Shareholders at least once in every 16 weeks, and the term 'cost-book' is defined to include all the subsidiary books kept in the mine. Hence *Cost-book Company*, a kind of partnership formed to work a *Cost-book Mine* on the *Cost-book System*, according to which any partner is at liberty to withdraw after such periodical settlement of accounts, without further liability.

'The simplest mode was when each threw the wine left in his cup so as to strike smartly in a metal basin, at the same time invoking his mistress's name; if the whole fell with a distinct sound into the basin, it was a sign he stood well with her' (Liddell & Scott).

*Asmole MS.* 837 (17th c.) art. viii. fol. 162 An Esquire... is he that in times past was Cottrell to a knight... whereof every knight had twice at the least [in] attendance upon him, in respect of the fee, For they held their land of the knight by Cottage, as the knight held his of the king by knight service.]

1. A dwelling-house of small size and humble character, such as is occupied by farm-labourers, villagers, miners, etc.

Historically the term is found first applied to the dwelling-places or holdings which under the feudal system were occupied by the cottars, cottiers, cotsets, or cotterells, and by the labourers of a farmstead; dwellings for the labouring classes in rural and urban districts were, under this name, the subject of various legal enactments, such as 31 *Edw. c. 7*, 15 *Geo. III. c. 32*, etc., and, when under a certain rental, were exempted from paying church-rate, poor-rate, etc.; with the disappearance of legal regulations and exemptions, and under the influence of 4, the term has become more vague in its application.

4. The term cottage has for some time past been in vogue as a particular designation for small country residences and detached suburban houses, adapted to a moderate scale of living, yet with all due attention to comfort and refinement. While, in this sense of it, the name is divested of all associations with poverty, it is convenient, inasmuch as it frees from all pretension and parade and restraint' (*Penny Cycl. Supp.* (1845) I. 426). In this sense, the appellation *cottage ornée* (*ornée*) was in vogue, when picturesque effect was aimed at.

**Cottar**, *cotter* (kɒtə), [Partly ad. med.L. *cotarius*, f. *cota* col; partly a later formation from *COT sb.* 1 + -AR 3, -ER 1.]

1. Sometimes used to translate med.L. *cotarius*, applied in Domesday Book to a villain who occupied a cot or cottage with an attached piece of land (usually 5 acres) held by service of labour (with or without payment in produce or money).

*Cotarius* probably represented the OE. *cotsāta* or *cotset*, *cotsetla*, and *cotman*, or at least, with the *bordarius*, included these. The distinction between the *cotarius* and the *bordarius*, *bordar*, or *bordman*, has not been satisfactorily determined; when both are mentioned together the *bordarii* are usually named before the *cotarii*, and the latter are much less numerous. In some cases, also, Domesday seems to distinguish *cotases* and *cotarii*; thus under the manor of Haseberie, Wiltshire, there are 'xiii cotases, and ii cotar'. In Ellis's Abstract of Population in Domesday (II. 435-6), Devonshire has *bordarii* 487, *cotases* 70, *cotarii* 19. *servi* 3294, *villani* 8070.

LORNE in *Pall Mall G.* 10 May 1/2 The cotter is a man having any small holding of land, and paying, in proportion to its size, from £1 to £30 of rent. [In Branch I, repr. OF. *cuncile*, ONF. *concilie*, = L. *concilium* (*f. con-* together + *cal-* to call) a convocation, assembly, meeting, union, connexion, close conjunction; sometimes an assembly for consultation, in which sense it became confused with *consilium* an advisory body (though the confusion was perh. in most cases due to later scribes of MSS.). In mediæval times *concilium* was mainly appropriated to the assemblies convoked to settle points of doctrine and discipline in the Church, or the relations between Church and State in particular countries, — the *Councils*. An early L.-Gr. Gloss. in Du Cange has *Concilium*, συνεδριον, συμβούλιον, συνέδος; and an ancient Codex of the Canons quoted by him has 'Synodum autem ex Græco interpretari Comitatum, vel Coetum; Concilii autem nomen tractum ex more Romano'. In OF. *consilium* came down as a living word in the form *conseil*, while *concile* (*concire*) was used for the ecclesiastical *concilium*, which sense it still exclusively retains. In English, the two words were, from the beginning, completely confused: *conseil* was frequently spelt *conceil*; *concile* was spelt *consile* and *conceil*; and the two words were treated as one, under a variety of forms, of which *counseil*, later *counsel*, was the central type. In the 16th c. differentiation again began: *counceil*, later *council*, was established for the ecclesiastical *concilium*, *F. concile*; and this spelling has been extended to all cases in which the word means a deliberative assembly or advisory body (where L. has *consilium*, Fr. *conseil*), leaving *counsel* to the action of coun-

selling and kindred senses. The practical distinction thus established between *council* and *counsel* does not correspond to Latin or French usage.]

\* I. Uses derived from *L. concilium*.

† 1. *generally*. An assembly called together for any purpose; a convocation or congregation. *Obs.* In the simple sense found only at an early date, and passing imperceptibly into the sense of 'deliberative assembly' (4). *a 1300 Cursor M.* 16076 (Cott.) 2. *spec.* An assembly of ecclesiastics (with or without laymen) convened for the regulation of doctrine or discipline in the church, or, in earlier times, of settling points in dispute between the ecclesiastical and civil powers. [The only sense of *F. concile*.]

Variouly qualified according to its sphere, as *acumenical, general, national, patriarchal, provincial, diocesan* (this = synod). Without qualification, usually applied to *general councils*, i.e. those called together by an invitation to the church at large, and claiming to speak in the name of the whole church, whether ultimately accepted as doing so (*acumenical*) or not. In early times *general council* was used less definitely, e.g. for a national or provincial council. In the Middle Ages there were also *mixed councils*, which met to settle both spiritual and civil affairs.

3. In the New Testament, regularly used to render Gr. *συνοδus*, Vulg. *concilium*, chiefly in reference to the Jewish Sanhedrim, or a meeting of that body.

[In the MSS. and printed texts of the Vulgate, *concilium* and *concilium* are often confused; in Acts xxv. 12 the Clementine text has *concilio*, followed by the English versions, including 1611 and 1881, with *council*; but the oldest MSS. have *concilio*, the proper rendering of *συνοδus*. The Anglo-Saxon Gospels usually represent *concilium* by *gemot*, but they, as well as the versions of the Psalter, have sometimes *gesealc*, 'counsel, advice', implying that the translator had *concilium* before him in the Latin, e.g. in Mark xiv. 55 (where *concilium* is actually the reading of important MSS. written in Ireland and England). In Matt. xii. 14, *συνοδus* *ελαβον*, is rendered in the Vulgate *concilium faciebant*, for which Tindale, Channier, and version of 1611 have 'held a council'; current editions of 1611 have 'held a council', 1881, correctly, 'took counsel'.]

occasional general assemblies of the barons or peers in later times. Also used of similar national assemblies of other countries, as the Cortes of Spain or Portugal.

The last *Great Council* in England was that summoned by Charles I at York in 1640, after the practice had been long disused. The name, though proper to the assembly, is sometimes given to its constituents as a permanent body: cf. sense 6. So *General or National Council*.

7. *Sc. Hist.* The Scottish Privy Council, the members of which, called *Lords of Council*, sat for judicial business during the vacation of Parliament; also the *Daily Council*, a body having civil jurisdiction, created by Act Jas. IV, 1503, c. 58.

In 1532, the functions of the latter body, together with those of the 'Session of James I' (Act 1425, c. 65), and the judicial functions of the Lords Auditors of Parliament (instituted 1568-9) were combined in the *College of Justice*, also called *Court of Session*, then created. To the ordinary judges of this court, called in the Act of 1532 *Lords of Session*, the King exercised (till 1723) the right to conjoin three or four 'other Lords' from the members of his Council. Hence the judges of the court are styled *Lords of Council and Session*, and its records the *Books of Council and Session*.

1. A title of nobility in some European countries, corresponding to the English title *EARL* (by which in earlier times it was always translated).

It is now used to render not only the various cognate Romanic words, but also the German *graf* and its cognates in Du., Da., Sw., etc.

In reference to Roman History, it translates L. *comes*, as in *Count of Britain* (*Comes Britannicus*) and *Count of the Saxon Shore* (*Comes Litoris Saxonici*), two of the generals of the Roman province of Britannia in the 4th century.

**Counter-**, prefix:—ME. and AF. *countre-*, a. F. *contre-* (=Pr. It. *contra-*):—L. *contrā* adv. and

prefix (see CONTRA-) against, in return. The form in which the Lat. prefix has come down through Fr. into Eng. Used in words actually adopted from earlier F., as *counterbalance*, *counterchange*, *counterfeit*, *countermand*, *countermarch*, *countermark*, *countermine*, *counterpoise*, *countersail*, *countersign*, etc., and their derivatives; also in adaptations of later F. or Italian words in *contre-*, *contra-*; and in many words formed after them in English. *Counter* has thus become a living element of the language, capable of entering into new combinations even with words of Teutonic origin. It may be prefixed, when required, to almost any substantive expressing action, as *motion*, *counter-motion*, *current*, *counter-current*, or even to any word in which action or incidence is imputed, as *measure*, *counter-measure*, *poison*, *counter-poison*. Hence it is often viewed as an independent element, written separately, and practically treated as an adjective; see COUNTER *a*.

In those compounds which we have taken from French or Italian, the consolidation of the word is usually greater than in those formed in English, and they are regularly written as single words, as *counterbalance*, *counterfeit*, *countermand*, *countermarch*, though sometimes with the hyphen. The stress is normally, in verbs and their derivatives, on the root; in nouns and their derivatives, on the prefix: cf. *to undergo*, *underdone*. But there are exceptions, esp. where the noun stress is taken by a verb of the same form, as in *to counterfeit*. In words formed in English the two elements are in looser union, both accentually and in writing. In verbs the rhetorical or antithetical stress on the prefix may be equal to, or even for the nonce stronger than, that normally on the root, as in *to plan* and *counter-plan* (*counter-plan*), and the two parts are properly hyphenated. In nouns, when the *counter-* word is contrasted explicitly or implicitly with the simple word (as in 3, 4, 5), the predominant stress of the prefix is strongly marked, as in *counter-cheer*, *counter-announcement*. These are properly written with the hyphen (now rarely as a single word, but occasionally in two separate words). When such a contrast is not distinctly present (as in 6, 9), the predominance of the prefix is less marked, and the root-element may receive an equal or greater stress; in such case there is a growing tendency to write the prefix as a separate qualifying word, and in fact to treat it as an adjective. Thus *counter-side*, *counter-truth*, become *counter side*, *counter truth*: see *COUNTER a*.

All permanent compounds in *counter*-, with some of the more important of the looser combinations, are given in their alphabetical order; of the casual combinations (many of them nonce-words) of obvious meaning, examples here follow.

**I. verbs.** as **COUNTERACT**, **COUNTERMAKE**, **COUNTER-SAY**, **COUNTERWEIGH**, **COUNTER-WORK**, with their derivatives: which see in their alphabetic places. Also many nonce-words, either contextual, or framed as literal equivalents of French or Italian verbs in *contre-*, *contra-*, expressing the doing of a thing or performance of an action in the opposite direction or sense, with a contrary effect, or in opposition, retort, or response to the action expressed by the simple verb; sometimes with the notion of rivalling or outdoing, checking or frustrating that action; sometimes merely in reciprocation. Such verbs were formerly more frequently formed and used than now. Examples: *counter-address*, *counter-advise*, *counter-affirm*, *counter-ambush*, *counter-avouch*, *counter-beat*, *counter-bid*, *counter-bore*, *counter-cross*, *counter-dance*, *counter-dig*, *counter-fix*, *counter-gird*, *counter-judge*, *counter-lock*, *counter-meet*, *counter-petition*, *counter-plan*, *counter-please*, *counter-post*, *counter-pray*, *counter-preach*, *counter-prick*, *counter-refer*, *counter-ruin*, *counter-shine*, *counter-state*, *counter-swear*, *counter-thwart*, *counter-traverse*, *counter-tug*, *counter-vote*. A rare sense in English is that of 'across, cross-', as in *counter-dash*, *counter-strike*; **COUNTER-BAR**, **НАТОЧ**. (These are hyphenated, but were formerly often written entire. The main stress is on the verb.)
